standard AA battery

GET RELIABLE, AFFORDABLE **CONTINUOUS MONITORING** FOR YOUR GRAVITY INFUSION.

Healthcare workers around the world are dedicated to providing the best care they can, even when patient loads are heavy. One of their greatest challenges is IV medication management - especially for maternal and pediatric care.

With the DripAssist Infusion Rate Monitor, providers can deliver safer and more effective drug dosing to patients at a low cost. Built specifically to meet global needs for accurate and continuous infusion monitoring, DripAssist allows workers to provide quality care to more patients each day.

- Ensure accurate administration of medications
- Reduce expanding burden of non-communicable diseases
- Increase health system efficiency
